

Site 39 Inland Ranges Habitat Restoration Status Update

March 6, 2018

Habitat Restoration Annual Meeting

- 2017 habitat restoration activities
- Year 5 monitoring results

Plant Propagation

- Continue propagation of 5,962 plants to restore 3.3 acres

Erosion Control Repairs

- Continue to monitor HAs
- Currently performing minor repairs at HA 34

Irrigation System for HA 26

- Installation of irrigation system is complete (6,000 gallon system with 3,000 emitters)
 - Received ~10,000 gallons of water to test the system
 - 4,000 gallons of water leftover from prescribed burns
 - 6,000 gallons of water from OU2 treatment plant
 - Planning to acquire more water from OU2 treatment plant for first irrigation event
