

Preliminary Recommendations:
-Continue monitoring in all 2020 units.

Notes from 2020 monitoring:
-One 37mm projectile (Unit 15) was designated as "suspect MEC." It is currently designated as material potentially presenting an explosive hazard (MPPEH) and is stored in a designated storage location awaiting detonation.
-No MEC item as found.
-MEC-like MD was found in Ranges 43-48 South, WGBA-NE, and Units 18/22; 14/19, 21, and 11/12.

- Unit - Surface monitoring to be performed in 2020
- Unit - No surface monitoring to be performed in 2020
- Unit - Completion of surface MEC removal pending (no surface monitoring)
- Eucalyptus Fire Area
- Impact Area MRA
- Former Fort Ord Boundary
