

Site 39 Inland Ranges Habitat Restoration Status Update

July 9, 2026

2026 Monitoring

- Completed spring/summer surveys, including HMP annuals, vegetation cover, species richness, and photo points.
- In 2026, one restoration site, HA 19, is in its final year (13) of monitoring.

2026 Caretaking

- Continue maintaining all restoration sites through weed management, erosion control, and corrective actions. Currently removing invasive pine trees within and adjacent to restoration sites.

HA 19: 2013
