

SECTION 15

FINAL REPORT

A final report will be generated by USAEHA upon completion of verification survey and all other parts of the surveying process. It will be staffed through appropriate agencies to the NRC for approval.

Information relating to Radon surveys, exposure risk, or potential contamination is addressed by the Environmental & Resource Management Division at Fort Ord. The program is managed in accordance with AR 200-1 Environmental Protection and Enhancement, 23 April 1990 and Technical Guide No. 64, The Department of the Army Radon Program, 19 September 1989.
