

Table 6-34
Interim Action Ranges MRA Number of Grids per Density of Monterey Spineflower
after Vegetation Cutting in North Range 44 SCA

ESCA RP 2014 Annual Natural Resources Report

IAR MRA - North Range 44 NCAs and SCAs			
Estimated Density of Monterey Spineflower Based on Year Since Vegetation Cutting			
Year	Pre-Activity (2010 - 2011 baseline)	Year 1 (2013)	Year 2 (2014)
Number of Grids Affected by Activity	--	41	
Density			
0 plants/grid cell (percent of grids)	--	1 (3%)	6 (15%)
1-50 plants/grid cell (percent of grids)	3	1 (3%)	5 (12%)
51-100 plants/grid cell (percent of grids)	3	1 (3%)	3 (7%)
101-500 plants/grid cell (percent of grids)	0	7 (23%)	12 (29%)
>500 plants/grid cell (percent of grids)	0	21 (68%)	15 (37%)
Number of Occupied Grid Cells	6	30	35
Total Grid Cells Sampled	--	31	41
